Range brochure

The vacuum cleaner that doesn't lose suction.

*“We look at every detail: how machines move, how people use them, how to reduce raw materials while staying strong. The priority is always the same – improvement.”*

*James Dyson*

JAMES DYSON  
Inventor of cyclone vacuum technology

## Over 35 years of invention

Ballbarrow

1974

While renovating, James designs the Ballbarrow. A wheelbarrow with a load-spreading ball that stops it sinking into the mud.

Dual Cyclone™ technology

1993

Dual Cyclone™ technology and DC01, the first vacuum with no loss of suction.

DC02

1995

Dyson cyclone technology is developed to fit the shape of a barrel vacuum. Within 14 months, it's the UK's best-selling barrel.

Radix Cyclone™ technology

2001

Dyson develops Radix Cyclone™ technology. Dust and dirt is now captured from the airflow using eight cyclones.

Ball™ technology

2005

No more wheels. DC15 rides on a ball to steer without the awkward moves of conventional vacuums.

Dyson Airblade™ hand dryer

2006

The Dyson Airblade™ hand dryer uses 640km/h sheets of air, scraping water from hands in just 10 seconds.

Radix Cyclone™ technology + intermediary cyclone

2008

Improved cyclone technology includes an intermediary cyclone, to capture even more microscopic dust than any other cyclone.

Dyson digital motor

2009

The Dyson digital motor is smaller than conventional motors, yet it spins up to 104,000rpm – five times faster than a racing car engine.

DC31 Handheld

2009

The next generation of Dyson handhelds, powered by the Dyson digital motor. It's the most powerful handheld.

Air Multiplier™ technology

2009

The Dyson Air Multiplier™ fan with no blades. Air is amplified 15 times, giving an uninterrupted stream of smooth air.

Dyson Digital Slim™ vacuum cleaner

2010

The Dyson Digital Slim™ vacuum cleaner has twice the suction of any other lightweight cordless vacuum cleaner - and it doesn't lose suction.

Dyson Ball™ vacuum

2011

Turns on the spot. The only barrel vacuum cleaner with a central steering mechanism - for greater control.

The Dyson Airblade™ hand dryer was awarded the Carbon Reduction Label from the Carbon Trust and Planet Ark for the product's life cycle measurement and communication of total greenhouse gas emissions released, along with a commitment to further reduce these emissions in the next two years. The Australian International Design Award™ is the independent symbol of product design excellence. It represents that this product has been assessed by an independent panel of Australian and international design experts who recommend that Standards Australia endorse it as an example of design excellence. Australian International Design Awards. A division of Standards Australia.

## Other vacuum cleaners lose suction

### Bagless vacuum cleaners lose suction.

Although they might look similar to one another, many other bagless vacuum cleaners have inefficient cyclones. They capture less dirt than others so rely on filters to trap it instead. Just like bags, these disposable filters clog during use causing suction to drop.

## Dyson cyclone technology doesn't lose suction

### With a Dyson vacuum cleaner there's no loss of suction.

Dyson vacuum cleaners don't have bags and don't rely on filters. Dyson cyclone technology generates forces up to 268,000G to separate even microscopic particles from the airflow. So there's no loss of suction.

### Bagged vacuum cleaners can lose suction too.

James Dyson developed vacuum cyclone technology because bagged vacuum cleaners lose suction. When you use them, pores in the bag clog with dust causing suction to drop.

## Captures more dirt than any other cyclone

Dyson has been continually refining cyclone technology since inventing it more than 20 years ago.

Radial Cyclone™ technology has been developed with remodelled airflows to maximise suction. Improved flow efficiency reduces turbulence and preserves air pressure, so more microscopic particles are extracted by the inner cyclones. These refinements help remove more dirt, dust, allergens and pet hair from the home.

# Choosing the right Dyson vacuum cleaner

Here's a few things to consider when choosing a new Dyson vacuum cleaner:

## Type of clean

- For the main clean, choose a barrel or upright vacuum that best suits your house size
- For quick, in-between cleans, a handstick is ideal
- For spot cleans, choose a handheld

## Size of house

- A full size vacuum cleaner is best suited to family homes
- For villas or apartments, a medium size vacuum cleaner is ideal
- In small studios or one bedroom flats, choose a compact vacuum cleaner

## Type of floor

- Different heads are designed for improved pick-up on different surfaces
- A triggerhead or motorised head provides high pick-up on carpets
- A hard floor tool improves pick-up on hard floors and tiles

## Pet hair removal

- Dyson's triggerhead or motorised models are best for homes with pets
- Selected machines include extra tools to remove stubborn pet hair from carpets
- Consider the Groom tool accessory for mess-free grooming of your dog

## Allergy sufferers

- All Dyson Uprights and Barrels are accepted by the National Asthma Council Australia
- Dyson cyclones can capture particles down to 0.5 microns - including pollen mould and bacteria
- Dyson Allergy models have a mattress tool to remove dust mite faeces

## Ease of use

- Dyson Ball™ technology turns on the spot without the awkward moves
- Selected Dyson models feature brush bar control at the handle
- All Dyson models excluding Handhelds feature wands for high reach cleaning

## BARRELS

# dyson ball

No loss of suction.  
No awkward moves.

**Radial Cyclone™ technology**  
Remodelled airflows maximise suction.

**Ball™ technology**  
Turns on the spot. The only barrel vacuum cleaner with a central steering mechanism – for greater control.

## Ball engineering

The ball houses many of the major vacuum cleaner components: motor, polycarbonate air ducts and cable. This lowers the centre of gravity, making the machine easy to control.

**DC**  
**39**

Engineered to remove more dust.  
Follows without the awkward moves.

**Captures more dirt than any other cyclone**

Radial Cyclone™ technology has remodelled airflows to maximise suction.

**Combination accessory tool**

Nozzle converts to a brush tool for dusting.

**Stair tool**

For improved stair cleaning.

**Air Switch**

Activated by a change in air pressure, this switches the brush bar on and off.

**No extra costs**

Other machines are still designed to need replacement bags or filters.

**Lightweight adjustable wand**

Adjust to length you need.

**Tough, durable construction**

Made from the strongest materials available to withstand bumps.

**Lifetime HEPA filter**

For allergy sufferers. Captures pollen, bacteria and mould spores.

**Suction release trigger**

Reduces suction so you can clean curtains, upholstery or rugs without them sticking to the cleaner.

**Swivel cuff**

Prevents hose from twisting during use.

**Captures allergens, expels cleaner air**

Dyson cyclones can capture particles down to 0.5 microns – including pollen, mould and bacteria.

**Detachable handle**

Attach tools directly, to clean awkward places.

**Clear bin**

Made from tough polycarbonate. Lets you see when it needs emptying.

**Hygienic bin emptying**

Just push the button, no need to touch the dirt.

**Follows without the awkward moves**

Wheeled vacuum cleaners can be awkward – heavy to pull, head the wrong way and collide with obstacles.

A Dyson Ball™ vacuum cleaner cleans without the awkward moves.

**Ball™ technology**

Turns on the spot. The only barrel vacuum cleaner with a central steering mechanism – for greater control.

**Articulating cyclone pack**

The cyclone pack articulates with the chassis, so it's easy to control when moving around obstacles.

**Smooth cable rewind**

Cable rewind system has increased torque, so it's faster and less likely to catch on obstacles.

**Axle bearings**

Bearings in the axle reduce friction, enabling the ball to rotate smoothly.

**Low centre of gravity**

The balanced arrangement and low motor position provide a low centre of gravity - maximising stability.

**Ball underside**

The ball's smooth surface means it doesn't dig into carpet pile.

**Low hose connection point**

Keeping the applied force closer to the ground increases stability when pulled.

**Flexible cuff**

Acts as a shock-absorber – re-aligning the machine to keep it on course when pulled.

Approved by the National Asthma Council Australia.

# New cleaner head technology

## Musclehead™ tool

Self-adjusts across all floor types.  
Low profile for cleaning under furniture.

### Self-adjusts for hard floors

On hard floors, the Musclehead™ tool brushes stay in contact with the floor removing debris from the surface.

### Self-adjusts for carpets

When the head moves across a carpet, the pile agitates the surface recognition switch. This lifts the brushes, exposing the carpet to the dual channel edges that remove dirt trapped within the weave.

## Triggerhead tool

The only turbine head activated at the handle. No more bending down.

### Pressure Trigger

Creates a drop in pressure which switches the turbine head on and off. No wires, no electronics.

### Air switch

Activated by a change in air pressure, this switches the brush bar on and off.

# DC 39 multi floor

Cleans every floor type.

### Musclehead™ tool

Self-adjusts to maintain contact with the floor for a quicker clean. Switches easily between carpet and hard floors.

# DC 39 allergy

For high performance on carpets and mattresses. Ideal for people with asthma and allergies.

### Mattress tool

Removes dirt and dust mite faeces from mattresses and upholstery.

### Triggerhead tool

For high dirt and pet hair pick-up from carpets. Brush bar can be turned off at the handle for delicate rugs and hard floors.

# DC 39 animal

Powerful all-round pet hair removal. High performance on carpets, hard floors and upholstery.

### Swivel hard floor tool

For high pick-up on hard floors.

### Triggerhead tool

For high dirt and pet hair pick-up from carpets. Brush bar can be turned off at the handle for delicate rugs and hard floors.

### Mini turbine head

For pet hair pick-up.

# DC 38 multi floor

Performance of a big vacuum.  
Lightest to pull.

### Turbine head with carbon fibre brushes

Air-powered turbine spins the brush bar. Anti-static carbon fibre brushes clean hard floors. Rotating nylon brushes remove more dirt from carpets.

### Ball™ technology

Turns on the spot. The only barrel vacuum cleaner with a central steering mechanism – for greater control.

### Hygienic bin emptying

Just push the button, no need to touch the dirt.

### Flexible cuff

Acts as a shock-absorber – re-aligning the machine to keep it on course when pulled.

Approved by the National Asthma Council Australia.

### Captures more dirt than any other cyclone

Radial Cyclone™ technology has remodelled airflows to maximise suction.

### No extra costs

Other machines are still designed to need replacement bags or filters.

### Swivel cuff

Prevents hose from twisting during use.

### Suction release trigger

Reduces suction so you can clean curtains, upholstery or rugs without them sticking to the cleaner.

### Detachable handle

Allows tools to fit directly onto the end of the hose for cleaning in confined spaces.

### Tough, durable construction

Made from the strongest materials available to withstand bumps.

### Captures allergens, expels cleaner air

Dyson cyclones can capture particles down to 0.5 microns – including pollen, mould and bacteria.

### HEPA filtration\*

Ideal for allergy sufferers. Captures microscopic allergens as small as pollen and mould.

### Axle bearings

Bearings in the axle reduce friction, enabling the ball to rotate smoothly.

### Low centre of gravity

The balanced arrangement and low motor position provide a low centre of gravity - maximising stability.

# DC 38 i

Performance of a big vacuum.  
Lightest to pull.

### Captures more dirt than any other cyclone

Radial Cyclone™ technology has remodelled airflows to maximise suction.

### No extra costs

Other machines are still designed to need replacement bags or filters.

### Swivel cuff

Prevents hose from twisting during use.

### Suction release trigger

Reduces suction so you can clean curtains, upholstery or rugs without them sticking to the cleaner.

### Detachable handle

Allows tools to fit directly onto the end of the hose for cleaning in confined spaces.

### Tough, durable construction

Made from the strongest materials available to withstand bumps.

### Captures allergens, expels cleaner air

Dyson cyclones can capture particles down to 0.5 microns – including pollen, mould and bacteria.

### HEPA filtration\*

Ideal for allergy sufferers. Captures microscopic allergens as small as pollen and mould.

### Hygienic bin emptying

Just push the button, no need to touch the dirt.

### Ball™ technology

Turns on the spot. The only barrel vacuum cleaner with a central steering mechanism – for greater control.

### Mini Flat Out™ head

Compact and low profile for easy cleaning under very low furniture.

### Swivel hard floor tool

180° pivot and debris channel for high pick-up on hard floors.

### Flexible cuff

Acts as a shock-absorber – re-aligning the machine to keep it on course when pulled.

Approved by the National Asthma Council Australia.

### Axle bearings

Bearings in the axle reduce friction, enabling the ball to rotate smoothly.

### Low centre of gravity

The balanced arrangement and low motor position provide a low centre of gravity - maximising stability.

\* Whole machine HEPA filtration tested according to ASTM F1977.

# DC 29 multi floor

Cleans every floor type.

**Dual mode floor tool**  
For dirt pick-up on all floor types. Switches easily between carpets and hard floors.

**Swivel cuff**  
Prevents hose from twisting during use.

**Detachable handle**  
Click-fit tools directly to the end of the hose for cleaning confined spaces.

**Suction release trigger**  
Clean curtains, upholstery or rugs without them sticking to the cleaner.

**Convenient tool storage**  
Combination accessory tool and stair tool store on the wand so they're always on hand.

**Lightweight adjustable wand**  
Adjusts to the length you need.

**Radix Cyclone™ technology**  
Patented Dyson technology that doesn't lose suction as you vacuum.

**Captures allergens, expels cleaner air**  
Dyson cyclones can capture particles down to 0.5 microns – including pollen, mould and bacteria.

**Lifetime HEPA filter**  
Ideal for people with asthma and allergies.

Approved by the National Asthma Council Australia.

# DC 26 allergy

Compact. For all floor types.

**Dual channel floor tool**  
Two separate airflow channels direct suction evenly - for dirt pick-up across all floor types.

**Swivel hard floor tool**  
180° pivot and debris channel for high pick-up on hard floors.

**Small in size, big on performance.**  
Ideal for studios and one bedroom flats.

**Radix Cyclone™ technology**  
Patented Dyson technology that doesn't lose suction as you vacuum.

**Variable suction**  
Clean curtains, upholstery or rugs without them sticking to the cleaner.

**Convenient tool storage**  
Combination brush/crevice tool and stair tool store on the wand so they're always on hand.

**Lightweight adjustable wand**  
Full-size wand adjusts to the length you need.

**Hygienic one-touch bin emptying**  
Just push the button, no need to touch the dirt.

**Captures allergens, expels cleaner air**  
Dyson cyclones can capture particles down to 0.5 microns – including pollen, mould and bacteria.

**Lifetime HEPA filter**  
Ideal for people with asthma and allergies.

Approved by the National Asthma Council Australia.

# dyson ball

No loss of suction.  
No awkward moves.

**Radial Cyclone™ technology**  
Remodelled airflows to maximise suction.

**Ball™ technology**  
Turns on the spot with no awkward moves. It's easy to steer along edges and into awkward gaps.

**Self-adjusting cleaner head**  
Brush bar height self-adjusts across all floor types. No fiddly dials or bending down to make adjustments.

## Self-adjusting cleaner head

Many vacuum cleaners use fixed settings and don't adjust to different floor types – the bigger the gap, the more suction is wasted.

DC40 have an active base plate. It creates the optimal cleaner head contact for every floor type, reducing air leaks and retaining suction.

### How it works:

#### On hard floors

The base plate lowers to create an efficient seal. The brush bar lifts clear of the floor to protect delicate surfaces.

#### On carpet

The base plate rises and the brush bar lowers for optimum bristle penetration – removing ground-in dirt and pet hair from different depths of carpet pile.

## Easy to use

#### Turns on the spot

Ball™ technology steers smoothly. Allows easy access to awkward spaces.

#### Durable

Engineered materials are selected for their strength and durability.

#### Instant release wand

Stretches up to 5 times in length for stairs and hard to reach places.

#### Hygienic one-touch bin emptying

Just push the button, no need to touch the dirt.

# DC 40 allergy

Steers into difficult places.  
Ideal for people with asthma and allergies.

**Self-adjusting cleaner head**  
Optimal cleaner head contact with every floor type, reducing air leaks for more suction.

**Combination floor tool**  
For all floor types. Low reach to clean under beds and sofas.

**Mattress tool**  
Removes dirt and dust mite faeces from mattresses and upholstery.

**Pedal-free automatic recline mechanism**  
Simply recline and go.

Approved by the National Asthma Council Australia.

**Captures more dirt than any other cyclone**  
Radial Cyclone™ technology has remodelled airflows to maximise suction.

**Instant release wand**  
Stretches up to 5 times in length for stairs and hard to reach places.

**Fingertip control**  
To instantly turn the motorised brush bar off for delicate rugs and hard floors.

**Hygienic one-touch bin emptying**  
Just push the button, no need to touch the dirt.

**Lightweight and durable construction**  
Engineered materials are selected for their strength and durability. Less weight and bulk.

**On-board tool storage**  
Combination accessory tool and stair tool are stored on the machine so they're always on hand.

**Captures allergens, expels cleaner air**  
Dyson cyclones can capture particles down to 0.5 microns – including pollen, mould and bacteria.

**HEPA filtration\***  
Ideal for allergy sufferers. Captures microscopic allergens as small as pollen and mould.

**Ball™ technology**  
Turns on the spot with no awkward moves. It's easy to steer closer to edges and into awkward gaps.

# DC 24 multi floor

Compact. For high performance on carpets and hard floors.

**Motorised brush bar and brush control**  
Motorised brush bar removes more pet hair and dirt from carpets. Turn the brush bar off at the touch of a button to protect delicate rugs and hard floors.

**Swivel hard floor tool**  
180° pivot and debris channel for high pick-up on hard floors.

**Reversible wand**  
Reversible wand for stairs and high-reach cleaning.

**Ball™ technology**  
Steers smoothly with a turn of the wrist.

Approved by the National Asthma Council Australia.

**Radix Cyclone™ technology**  
Patented Dyson technology that doesn't lose suction as you vacuum.

**Concentrated technology**  
Picks up as much as a full-size Dyson upright. Ideal for smaller homes.

**Shrinks to store away**  
The handle compresses to 1/3 of its height, so you can store it in small spaces.

**Fingertip brush control**  
Turn the brush bar on and off at the touch of a button.

**Hygienic one-touch bin emptying**  
Just push the button, no need to touch the dirt.

**Combination accessory tool**  
Nozzle converts to a brush tool for dusting.

**Captures allergens, expels cleaner air**  
Dyson cyclones can capture particles down to 0.5 microns – including pollen, mould and bacteria.

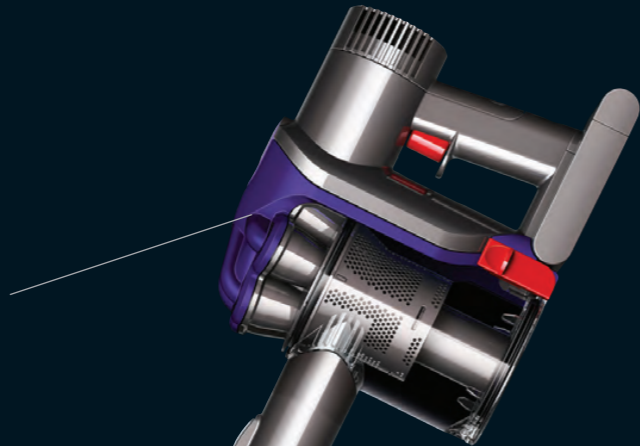

**Lifetime HEPA filter**  
Ideal for people with asthma and allergies.

\* Whole machine HEPA filtration tested according to ASTM F1977.

# Dyson cordless vacuum cleaners

## Radix Cyclone™ technology

Patented technology that doesn't lose suction as you vacuum.

## Dyson digital motor

More powerful, using less energy than conventional motors. Creates the most power-efficient handheld.

# Concentrated technology

Concentration is about making something smaller without compromising performance or durability. For Dyson engineers, it's a systematic process where every component is interrogated and painstakingly developed and tested. Smaller and lighter without compromising performance.

## Dyson digital motor

Conventional motors work by passing current through their carbon brushes, making them spin. Lots of sparks, heat and wasted energy. In the Dyson digital motor, intelligent electronics constantly adjust to create a powerful magnetic field – spinning a neodymium magnet up to 104,000 times a minute.

Impeller and magnet spin up to 104,000rpm.

Impeller shroud creates closed profile.

Vane diffuser recovers more air power from the airflow.

Capacitors and circuit board control power and speed.

# dyson digital slim

Twice the suction of any other lightweight cordless vacuum cleaner in use.

**Powered by Dyson digital motor**  
Up to 3 times faster than conventional motors. Creates the most power-efficient cordless vacuum cleaner.

**Lithium-ion battery**  
Recharges up to 3 times faster than others.

**Up top, down below and in-between**

Includes tools and wand for cleaning every floor type and awkward spaces.

## Dual power mode

**15 minutes**

High constant suction. (13 mins with motorised tools attached).

**6 minutes**

MAX power for more difficult tasks.

## Radix Cyclone™ technology

Patented technology that doesn't lose suction as you vacuum.

## Hygienic one-touch bin emptying

Just push the button to release the dirt.

## Detachable long-reach wand

Reaches up high, down low and into awkward gaps.

## Docking station

Recharges and stores the machine and attachments when not in use.

## Remote charging

Battery can be recharged away from the machine and the docking station.

## Crevice tool

For cleaning in tight gaps and narrow spaces.

## Combination accessory tool

Nozzle converts to a brush tool for dusting.

## Pivots for easier steering

Cleaner head pivots 180° without losing contact with the floor. No more awkward moves.

Powered by an ENERGY STAR qualified battery charger for a better environment.

# DC 35 animal

Up top, down below and in-between cleans in the home and car.

## Motorised floor tool with carbon fibre brushes

Anti-static carbon fibre brushes clean hard floors. Rotating nylon brushes remove more dirt from carpets.

## Mini motorised brush bar

Removes more pet hair and dirt from carpets and upholstery in the home and car.

# DC 35 multi floor

Up top, down below and in-between.

## Motorised floor tool with carbon fibre brushes

Anti-static carbon fibre brushes clean hard floors. Rotating nylon brushes remove more dirt from carpets.

DC  
34

**LED battery indicator**

Indicates battery charge level and diagnostic status.

**Direct charging**

Charger plugs directly into the battery - doesn't have to be attached to the machine.

**Twice the suction**

Twice the suction of any other handheld in use.

**Radix Cyclone™ technology**

Patented Dyson technology that doesn't lose suction as you vacuum.

**Lightweight and ergonomic**

Balanced weight distribution for easy handling.

**Dual power mode**

**15 minutes**

High constant suction. (13 mins with motorised brush bar attached#).

**6 minutes**

MAX power for more difficult tasks.

**Dyson digital motor**

More powerful, using less energy than conventional motors. Creates the most power-efficient handheld.

**Hygienic one-touch bin emptying**

Just push the button, no need to touch the dirt.

**Dual power mode**

Max mode for intense cleaning.

**Up to 3 times faster recharging**

Lithium ion battery technology – recharges up to 3 times faster than others.

#DC34 Animal only.

DC  
34 animal

High performance spot cleaning on carpets and upholstery in the home and car.

**Mini motorised brush bar**

Removes more pet hair and dirt from carpets and upholstery.

**Crevice tool**

For cleaning in tight gaps and narrow spaces.

**Combination accessory tool**

Nozzle converts to a brush tool for dusting.

DC  
34

For high performance spot cleaning in the home and car.

**Crevice tool**

For cleaning in tight gaps and narrow spaces.

**Combination accessory tool**

Nozzle converts to a brush tool for dusting.

# Motorised floor tool

## Anti-static carbon fibre brushes for hard floors

Dyson's carbon fibre brush bar has rows of ultra-fine brushes engineered to remove fine dust from hard floors. These brushes are made from pure carbon fibre, selected for its anti-static properties.

## Stiff nylon brushes for carpets

Stiff nylon brushes spin up to 1400 times a minute. For cleaning ground-in dirt on rugs and carpets.

### Pivots for easier steering

Cleaner head pivots 180° without losing contact with the floor. No more awkward moves.

### Velour bumper

Protects furniture and walls from bumps.

### Carbon fibre brushes

Rows of ultra-fine carbon fibre filaments engineered to remove fine dust from hard floors.

### Cleans under low furniture

82mm cleaner head. Also stays flat to the floor when pulling back and when the machine is fully reclined.

### Stiff nylon brushes for carpets

Stiff nylon brushes remove ground-in dirt from carpets.

# Accessories

Dyson engineers have developed a range of tools to fit your Dyson vacuum cleaner. There's one for every kind of cleaning task.

### Stubborn dirt brush

Ideal for cleaning mud and dried-in dirt from floors and upholstery. Fits all models.

RRP: \$28\*

Part no. 918507

### Mattress tool

Ideal for removing dirt and dust mite faeces from mattresses and upholstery. Fits all models.

RRP: \$38\*

Part no. 908940

### Up top tool

Twists to give multiple angles for cleaning hard to reach surfaces. Fits all models except handhelds.

RRP: \$48\*

Part no. 917645

### Soft dusting brush

Ideal for cleaning blinds and dusting around the home. Fits all models.

RRP: \$38\*

Part no. 908877

### Flexi crevice tool

Extends and flexes into awkward gaps in the home or the car. Fits all models.

RRP: \$48\*

Part no. 908032

### Groom tool

Self cleans. Mess-free vacuum assisted dog grooming. Fits all models except DC01 and cordless models. (If you have a barrel motorhead model please contact Dyson Customer Care).

RRP: \$88\*

Part no. 921000

### Flat Out™ head

Super-low profile for easier cleaning under low furniture. Fits all models except cordless models.

RRP: \$68\*

Part no. 914606

### Swivel hard floor tool

Ideal for pick-up on hard floors. Fits all models except DC01, DC21 Motorhead, DC23 Motorhead and cordless models.

RRP: \$68\*

Part no. 920018

### Mini turbine head

Ideal for picking up pet hair from stairs and upholstery. Fits all models except DC01, DC02, DC03, DC24 and cordless models.

RRP: \$68\*

Part no. 915022

### Turbine head

For high dirt and pet hair pick-up from carpets. Fits all barrel models except DC02, DC05 Motorhead, DC08, DC19, DC22, DC26 and DC38.

RRP: \$128\*

Part no. 911566

### Tool kit

Ideal for cleaning the car and around the home. Kit includes: Stubborn dirt brush, Mini soft dusting brush, Mattress tool and Extendable hose reaching up to 1.1m. Fits all cordless models.

RRP: \$98\*

Part no. 919648

### Car cleaning kit

Three tools for a spotless car interior. Kit includes: Flexi crevice tool, Stubborn dirt brush and Mini turbine head. Fits all Dyson vacuums except DC01, DC02, DC03, DC24 and cordless models.

RRP: \$138\*

Part no. 908909

\*Dyson's recommended retail prices correct as at June 2012 but subject to change. Accessory colours may vary from pictures shown.

**All Dyson vacuum cleaners feature:**

- No loss of suction as you vacuum
- Dyson's patented cyclone technology
- Captures allergens, expels cleaner air
- No ongoing costs – lifetime filters
- Suitable for all floor types
