

Earth Rangers

9520 Pine Valley Dr.
Woodbridge, ON L4L 1A6

“Dyson Airblade™ is an innovative product that saves energy, and Earth Rangers is all about finding innovative solutions to saving energy. By installing Dyson Airblade™, we are sending a message that we are capable of making positive changes to improve our present environmental situation.”

Graham Seaman, Earth Rangers Manager

The Earth Rangers Theatre

Earth Rangers believes that children have the power and desire to change the world – and the right to inherit a healthy planet.

Through live shows and online programs, children gain the knowledge, skills and tools necessary to have a genuine and measurable impact on the natural world and their own future.

Before Dyson Airblade™ we had traditional heated forced air hand dryers at the Earth Rangers Centre,” says Graham Seaman, Earth Rangers Manager. “Based on our experience so far, we estimate Dyson Airblade™ is at least 20 times more energy efficient than our previous units.”

“At Earth Rangers, kids learn about simple, every day things we can all do to make a difference and Dyson Airblade™ truly reflects our mandate,” he says.

Graham also appreciates the functionality of Dyson Airblade™. “Even though we had hand dryers installed, our staff was actually using tissues to dry their hands. The out-dated dryers simply didn’t work.”

Dyson Airblade™ has been very well received by visitors and employees. “Kids love the way they look. Best of all, they love drying their hands with Dyson Airblade™ so it encourages them to wash their hands. And our staff and adult visitors appreciate the aesthetic of the design.”

The Earth Rangers exciting and interactive shows capture the imaginations of students and teachers alike.

Skylights atop the Earth Rangers Centre are a testament to their commitment to green friendly

dyson airblade

The fastest, most hygienic hand dryer.
