Assembling DCO7

1. Slide hose into runners at back of machine and push down until it clicks.
2. Press wand release button and slide wand down into hose.

DCO7 Hose
Wand cap
Upper cable winder
Shroud release catch
Airway inspection valve
Valve release clips
Soleplate
Bin emptying trigger
Filter release catch
Ready-to-go hose release
On/off switch
Cyclone release catch
Shroud
Sleeve
Stair tool
Crevice tool
Brush tool
Floortool*
Using your DCO7

Plug in at mains and press on/off switch.

To start vacuuming, push cleaner head down with foot and pull handle towards you.

Ensure machine is in upright position before using tools.

Press wand release button and remove wand.

Reverse wand by inserting wand handle into hose.

Stair cleaning
Always work with the machine at the bottom of the stairs.

Powerful suction can cause the hose to “pull back” in use – please take extra care when cleaning stairs.

Using the tools

Ensure machine is in upright position before using tools.

Press wand release button 1 to release ready-to-go hose and slide wand to end of hose.

A Wand mode
Slide back wand cap and place tools directly on to wand handle.

B Hose mode
Fit tools directly on end of hose. For confined spaces such as car cleaning.

C Reversed wand mode
Fix tools, floor tool or groomer (see back page) on to end of wand. For hard to reach areas.

Ensure wand cap is closed, unless using with tools.

Anti-jam brushbar
(Not available on silver/yellow model).

1 Manual brush off for delicate rugs and floors.
2 Brush off when upright.
3 Auto brush on for normal cleaning.

NB: You can twist the brush and stair tool heads to make cleaning easier.

DCO7 silver/yellow is not recommended for hard floors: accessory tools are ideal. The brushbar continues to rotate while the hose is in use.

Ensure hair and loose clothing are kept clear of wand cap/brush bar when machine is switched on.
Where to look for blockages

- **Check that tools are clear of blockages.**
- **Remove wand and check inside for blockages.**
- **Press hose release button A from front of machine and slide hose out with lower cable winder from rear. Check inside hose for blockages.**
- **Tilt machine forward and slide out U-bend airway inspection B. Check inside for blockages.**
- **Squeeze valve release catches to remove airway inspection valve C. Check inside for blockages.**
- **Lie cleaner on its front.**
  1. Undo coloured fasteners using a coin and remove soleplate.
  2. Clear the brushbar obstruction, carefully cutting away any threads.
  3. Replace soleplate and tighten fasteners.

**Important**

Please note that clearing blockages is not covered by your cleaner’s guarantee.

**Turn power off and unplug before starting to clear any blockages.**

**Important**

Should any part of the machine become blocked it may overheat and stop due to the thermal cut-out being triggered. Unplug from mains and leave to cool down for at least 30 minutes.
Washing the lifetime pre-motor filter

1. Press filter release catch and remove filter housing from machine. Filter should be washed every six months. Circle your two washes.

2. Remove filter from housing. Only blue foam and yellow cage should be washed. Wash in cold water only.

3. Repeat steps 1 and 2 until water runs clear. Allow 12 hours for filter to dry. Make sure it is completely dry before replacing in machine.

4. Replace in filter housing and click back into machine.
Emptying the clear bin™

**Important**
Bin must be emptied when dust reaches MAX mark.

Press cyclone release catch with thumb to remove bin assembly.

**Option 1** (recommended for asthma/allergy sufferers).
A Wipe outside of clear bin with a damp cloth before emptying.
B Place bin in bag and pull bin emptying trigger to release dust into bag.

**Option 2**
A Empty directly into dustbin.
B Ensure bin base is closed securely and replace bin assembly on to machine.

Cleaning the shroud (if necessary)

Ensure bin is empty and bin base is open. Then press shroud release catch to remove bin.

Clean shroud with a cloth or dry brush to remove fluff and debris.

**Optional**

- You may rinse the clear bin with water.
- Do not use detergents.
- Do not immerse the whole cleaner in water.
- Ensure it is completely dry before replacing.

To replace bin, first click rear bin catch and then front bin release catch into place.

Ensure bin base is closed securely and replace bin assembly on to machine.

---

The British Allergy Foundation considers that this product may in proper use reduce exposure to both House Dust Mite (Der p 1) and Cat Allergen (Fel d 1). It is strongly recommended that a sensitive person should take care when emptying that they do not inhale the dust. We recommend the manufacturers’ emptying instructions should be strictly followed.

Allergens can be dangerous. If you believe that you or anyone in your home is allergic to the products of the machine, then the product should only be used by the individual identified and not others.

Exposure to allergens can be dangerous. If you believe that you or anyone in your home is allergic to the products of the machine, then the product should only be used by the individual identified and not others.

The British Allergy Foundation is a national charity (Charity Reg. No. 1003726) founded in 1993 with the aim of improving awareness, prevention and treatment of allergy.

The Foundation continually strives to help sufferers to help themselves, often setting to avoid or reduce exposure to relevant allergens. The Seal of Approval scheme forms a part of this initiative.
changing/fitting your belt
(silver/yellow model only)

1. recommended position for changing the belt, with wand removed.
2. undo fasteners using a coin and remove soleplate.
3. remove any debris and check spindle is clean.
4. to replace the belt - remove brushbar, loop belt around brushbar and feed through hole.
5. check end caps are in place.
6. using the back of the cleaner as a lever, loop the belt around your thumb. stretch and release over spindle.
7. rest the three tabs on the inside of the yellow bumper strip, before pivoting soleplate into position.

important

- this appliance is not intended for use by young children or infirm persons without supervision.
- young children should be supervised to ensure they do not play with the appliance.
- check that your electricity supply corresponds to that shown on the rating plate. the appliance must only be used as rated.
- if the supply cable of the appliance is damaged, disconnect the appliance from the socket outlet immediately. the supply cable must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.
