- Fine dust such as plaster dust or flour should only be vacuumed in very small amounts.
- Do not use the appliance to pick up sharp hard objects, small toys, pins, paper clips, etc. They may damage the appliance.
- When vacuuming, certain carpets may generate small static charges in the clear bin or wand. These are harmless and are not associated with the mains electricity supply. To minimise any effect from this, do not put your hand or insert

any object into the clear bin unless you have first emptied it and rinsed it out with cold water. See 'Cleaning the clear bin' section on page 8 of this Dyson Operating Manual.

- Powerful suction can cause the hose to 'pull back' – please take care.
- Do not work with the appliance above you on the stairs.
- Do not put the appliance on chairs, tables, etc.
- Before vacuuming highly polished floors, such as wood or lino, first check that the underside of the floor tool and its brushes are free from foreign objects that could cause marking.
- Do not leave the cleaner head in one place on delicate floors during use.

- To refit filter B:
 - Refit the filter on to the ball.

- Lay the appliance on its front.
- Detach the red 'C' clip which is on the connection between the cleaner head and the appliance; see the 'Brush bar maintenance' section on pages 6 and 7 of this Dyson Operating Manual. It is quite firm, but do not pull it off roughly. Use a constant, firm pressure.
- Pull the cleaner head away from the appliance. Use a constant, firm pressure.
- On the cleaner head are two silver dials: turn each a quarter-turn counter-clockwise until it clicks.
- Put the cleaner head onto its back:
 - Lift up the top edge of the base plate, so it rotates to the upright position.
